Certificate Monitor

The **Certificate Monitor** page allows users with the **Certificate Manager** role to view and track certificates that have been downloaded from **ActiveServer**.

> **User Access**
>
> A user requires the **Certificate Manager** role to access the Certificate Monitor page.

Search Certificates

The following fields are available to filter the certificate list:

- **Certificate Name** — unique name of the certificate.
- **Certificate Type** — type of certificate to search for.
- **Tracking** — filter by tracking status: **Enabled** or **Disabled**.
- **Revoked** — filter by revocation status: **True** or **False**.

Certificate List

The Certificate List displays all certificates that have been downloaded from **ActiveServer**. The tracking status for each certificate can be toggled on or off using the **Tracking** toggle.
